Subject: Raritan Bay Report Request

Wanda,

I was directed to you regarding obtaining a report titled "Summary Letter Report for Raritan Bay Slag, Old Bridge and Sayreville, New Jersey (prepared by Weston Solutions, Inc.)." See Nick Margriples's e-mail below.

Please let me know of any fees or forms that may be required to request this report. If you could also give me an idea of the time to process this request I would appreciate that as well.

Thank you,  
Ryan Vial

Subject: Re: Raritan Bay Slag Site

The email address is calderon.wanda@epa.gov.

The name of the document is entitled.....Summary Letter Report for Raritan Bay Slag, Old Bridge and Sayreville, New Jersey (prepared by Weston Solutions, Inc.).

The area the report covers spans from just west of the western jetty at the Cheesequake Creek Inlet to Margaret's Creek. The inlet is the border between Sayreville and Old Bridge in Middlesex County.

Margaret's Creek splits the areas of Laurence Harbor and Cliffwood Beach in Old Bridge. An additional area of concern that was recently added to the overall Site is a 50-acre wetland located just east of Margaret's Creek (between the neighborhoods of Laurence Harbor and Cliffwood Beach):
